Profile

Experienced Web Developer adept in all stages of web development. Knowledgeable in user interface, testing, and debugging processes. Able to effectively self-manage during independent projects, as well as collaborate as part of a productive team.

Employment History

Senior Software Developer, Robosoft Technologies, Bangalore

MARCH 2023

Projects

iKroya - Live Election Analysis

- Project is to create an India-first digital-platform for elections, on which the users are seeking data/information/analysis/opinions before and after the elections across the globe. Also to support vernacular languages in Android, iOS and Web. To create CMS in the backend for data consumption in frontend.

Capra - Kingdom OTT

- The Capra Project is launching a new SVOD OTT platform in 2023. The Capra Project is looking for a strategic partner with deep experience in the design and development OTT applications across Connected TVs, mobile devices and the web.

Senior Software Developer, Coforge

AUGUST 2022 – JANUARY 2023

- Worked as a senior software developer at Coforge, where I have taken on leadership roles in project planning and execution, mentored junior developers, and worked on projects for clients in the education and E-commerce industries.
- Improved website load times by optimizing front-end code and implementing efficient caching strategies.

Software Engineer, Tata Consultancy Services

JANUARY 2021 – JUNE 2022

Projects: Ecom for Pella client

- Built logistics solution provider with focus on speed, safe and reliable nation-wide express delivery services to e-commerce industry.
- Conducted code reviews and mentored junior developers to improve code quality and ensure adherence to best practices
- Built an intuitive user interface using React.js and Redux that improved user satisfaction by 30%
- Created a custom content management system (CMS) that simplified content creation and editing for non-technical users

Application Developer, Allstate India

OCTOBER 2017 – JANUARY 2021

Projects : Encompass Insurance

- It is a web-based application designed and developed to enable policyholders to be insured in an efficient way. It helps the customer to alter the start date of his insurance policy to a timeline earlier than when the policy was purchased. Basically, when the effective date of a policy is earlier than the application date
- I have also gained experience in collaborating with cross-functional teams and implementing best practices for web development

- Refactored existing method to improve adding new fields over 12 sets by automation, resulting in a 30% reduction in development time.

Education

B.E, Siddaganga Institute of Technology

JULY 2012 – JUNE 2016

CGPA 8.5/10
